### **RESEARCH INTERESTS:**

- Basaltic magmatism in Lau Basin, SW Pacific Ocean. One of my recent studies is Tonga-Kermadec back-arc basaltic magma for studying trace element recycling and mantle flow in subduction zones. I have some valuable samples from Valu Fa Ridge (VFR) and Central Eastern Lau Spreading Center (CELSC), and know Tonga-Lau arc-basin system very well.
- Carboniferous magmatism of ancient trench-arc-basin system at the southern margin of the Central Asian Orogenic Belt.
- Genesis of subduction-related magmatic Ni-Cu-(PGE) sulfide deposit at the southern margin of the Central Asian Orogenic Belt.
